## Statement

My recent work focuses on the beauty found in nature and its sacred and therapeutic influence to man, the work is embracing the technological changes that are taking place. I am expressing - the wholeness - holiness - seen in nature seeking to bridge the gap between ecology and theology: ecotheology. Through the use of the computer, I bring the viewer into my poetic vision of universal harmony between nature, man and technology. Aesthetically, I am seeking to show the harmony between the natural environment and the electronic one. My most recent adventures is to revisit "Alice's Adventures in Wonderland" by Lewis Carrol.
