Artist Statement

I am an internationally recognized glass artist, best known for creating site-specific installations. I typically work within the glazing areas of buildings, or my work functions as interior glass partitions, or screens. I also create sculptures, both free standing and wall mounted in wood, metal, and glass. I currently have installations in 36 states, as well as Canada, Japan, and Hong Kong. In addition to commissions I create autonomous works in glass, sculptures, paintings on board, and works on paper.
