

## **Jerri Brackett**

**BIO:** My early childhood experiences of visiting with my family, a MASSIVE public garden in Denver, Colorado before I was five years old, left a permanent impression on me and developed my "excessive exuberance" with my fantasy land-escapes. As an adult, I was fortunate enough to take four years of private group art lessons while my two sons were in grade school. I learned more than college classes with extensive design, color theory and art history from a fantastic art teacher. She taught us to SEE "space through pattern" OR "patterns through space." which broke my *flat design style* I began at sixteen.

I'm reclusive and don't do any social media and have been in 23 juried group art shows, 3 in Raton, New Mexico (when I left Colorado in 2018), 4 solo "one woman" art shows, 16 months in a Pueblo, Colorado Art center, and 11 juried online art shows. I currently live in Belen, New Mexico and exhibit a few paintings at the Belen Art League Gallery and Gifts. Now I'm in warm and sunny California!
