Artist Statement: Through my work, I conjure a world in which the stories within my psyche can play and explore their language through abstract forms. I want to create a painted reality in which change and transformation can occur. I approach painting as a sacred ritual. Each shape and mark has a meaning and an intentional place. I aim to channel my work, to get out of the way of it unfolding as much as possible, while listening to the direction the painting is trying to take me. I am inspired by primitive symbolism, folk art, nature, surrealism, and mythology.
