## Artist statement for “Shadow”

For Arts Benicia’s “Shadow” show, I searched my catalog for images where shadows enrich my street photography with either eye-catching boldness, as in the piece selected for this show, or nuanced depth for a more subtle presence.

## Biography

My lifelong passion for photography finds me fascinated both behind the lens and in the darkroom. In freezing moments on the street, I try to move like a ghost, ideally invisible within the midst of the scene, silently capturing intriguing or stunning moments between people, between people and events, or between people and their environment.
